Industry: Tourist Vehicle Rentals

SEO Cycle Duration: April 2025 to December 2025

Agency Partner: [White Label Partner]

Monthly Investment: $1045

CASE STUDY | SEO SUCCESS

Local SEO Turnaround for a Tourist Vehicle Rental Company

A tourist vehicle rental company partnered with our agency in April 2025 after experiencing several months of declining organic visibility. The client had previously worked with an SEO provider whose strategy relied heavily on a private blog network (PBN) with exact-match anchor text backlinks and a visible footprint. When the client dismantled this legacy PBN in May 2025, traffic dropped sharply. We stepped in to detoxify these harmful backlinks and stabilize rankings through clean link-building and improved on-page execution.

We consistently recommend paid search advertising as a strategic complement to SEO, allowing paid media to generate leads and brand visibility while SEO efforts build organic equity over time. The agency partner supporting this account engaged in paid search advertising throughout the campaign. We also provided strategic direction on timing a new website launch to minimize disruption during peak seasons and ensure Google sandboxing would not impact visibility at critical times.

Campaign Strategy & Execution

Technical SEO

Metadata cleanup, H1 structure alignment, and canonical adjustments to ensure proper site architecture and crawlability.

Local SEO

Unstructured citation building, rich content updates, and Google Business Profile optimization across multiple locations.

Link Building

Mixed link types including guest posts and niche edits from DR40+ sources to build clean, authoritative backlink profile.

On-Page SEO

Keyword mapping, topical content creation, and service page updates to target high-intent search queries.

Remarkable Results

Within nine SEO cycles from April to December 2025, we reversed the declining trajectory and delivered substantial year-over-year session growth, improved engagement, and expanded rankings across multiple high-intent local search terms:

+112%

Total Users

Increase in total users comparing December 2025 to January 2026 year-over-year

+531%

New Users

Dramatic increase in new users discovering the business through organic search

+28%

Engagement Rate

Improvement in engagement rate showing higher quality traffic and better user experience

+79%

Engagement Time

Increase in average engagement time indicating more compelling content and user interest

Ranking Achievements

The campaign delivered exceptional ranking improvements across both desktop and mobile search, with number one rankings for critical high-intent keywords and strong visibility across multiple locations:

1

Top Rankings Secured

- "{city} golf cart rental"
- "{city} rentals golf cart"
- "golf cart rental {city} {state}"

2

Top 3 Positions

- "rent golf carts {city}"
- "golf cart rentals {city}"
- "luxury golf cart rental near me"

3

Multi-Location Dominance

Strong Local Pack and Finder visibility across multiple city locations, establishing market leadership in key tourist destinations.

The campaign's success is evident across multiple traffic channels, with organic search showing the most dramatic improvement. This traffic acquisition data compares performance from December 2024 to December 2025, demonstrating the compound effect of our SEO strategy.

The 531% year-over-year growth in organic search sessions validates our strategic approach to clean link building, technical optimization, and local SEO execution. Combined with strong performance across paid and direct channels, the business achieved a holistic digital presence that drives sustainable growth.

Organic Search by Source

Yahoo / organic

150 sessions

Campaign Success & Future Outlook

This nine-cycle campaign successfully turned around a declining organic trend and built a foundation of clean SEO practices following a prior PBN-related penalty. The comprehensive approach addressed technical issues, detoxified harmful backlinks, and established the client as a dominant local search presence across multiple high-value locations.

By aligning local search strategy with technical precision and multi-location coverage, this tourist rental business transformed from a declining visibility position to market leadership in their category. The strategic timing of the website relaunch, combined with ongoing optimization across technical, on-page, and off-page factors, created a sustainable growth trajectory that positions the business for continued success.

Key Success Factors

- Detoxification of harmful PBN backlinks that were causing ranking penalties
- Strategic timing and execution of site relaunch to avoid peak season disruption
- Multi-location Google Business Profile optimization
- Clean, authoritative link building from DR40+ sources
- Comprehensive technical SEO improvements
- Integration of paid search to support organic growth

Looking Ahead to 2026

The tourist rental business is now in a strong position to scale in 2026. With clean SEO practices established, dominant local search visibility, and a solid technical foundation, the company can confidently expand into new markets and service offerings.

The combination of organic SEO equity and paid search advertising creates a powerful dual-channel approach that maximizes visibility and lead generation while building long-term sustainable growth.

> "This case study demonstrates the power of clean, strategic SEO practices in reversing declining organic performance. By addressing technical issues, building quality backlinks, and optimizing for local search across multiple locations, we transformed a challenging situation into a market-leading position."

Campaign Methodology

The success of this engagement relied on a systematic, data-driven approach that prioritized sustainable growth over quick fixes. Each monthly cycle included comprehensive analysis, strategic adjustments, and continuous optimization across all SEO pillars.

1. **April 2025**
   Campaign launch, initial audit, and PBN detoxification planning
2. **May 2025**
   Legacy PBN dismantled, backlink cleanup initiated, technical fixes implemented
3. **June–August**
   Local SEO buildout, citation development, content optimization across service pages
4. **September–November**
   Clean link building campaign, multi-location GBP optimization, ranking acceleration
5. **December 2025**
   Peak season performance, dominant rankings achieved, substantial YoY growth realized

Note: Data anonymized for white-label presentation. All performance metrics are based on internal tracking and analytics. This case study represents actual client results achieved through strategic SEO implementation over a nine-month engagement period.
